GOOD FOCUS

Clip 1

In the following clip it appears that the defender was slow to return to his defensive duties. Although the defender did make an effort to return to the offside line and attempt to get in front of the attacker. He was late. On the attacking side the vision and timing of the midfielder connecting with the forward was perfect. The AR is to be commended for focus, attention and composure to deliver the correct decision. The attacker was onside. Nice work Justin Parnicza!
