Angles

Clip7

The importance of referees to be near play and have an angle to see is critical. Student athletes work hard for their institution and to lose the game due to a decision by the referee that is over 40 yards away is unacceptable. From this clip, there are 3 major flaws.

1. On counter attacks, referees need to take an uncommon position to have a clearer angle.
2. This referee does not take the extreme position and therefore, it is impossible to see the challenge.
3. The referee does not consult with his AR. Although the AR is 40-50 yards away, they have an unobstructed view.
